Azure

Fortifying the Foundation: Security in Azure Cloud.

The Azure Security Accelerator streamlines cloud security implementation, resulting in a fortified infrastructure, improved compliance, and enhanced trust for your organization.

Protect Sensitive Data

iTrellis's Azure Security Accelerator offering helps safeguard your organization's valuable information by implementing robust security measures, minimizing the risk of data breaches and unauthorized access.
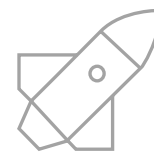

Maintain Compliance

Our expert consultants ensure that your Azure environment adheres to industry regulations and standards by implementing and enforcing Azure Policy, enabling your organization to operate confidently within the compliance landscape.
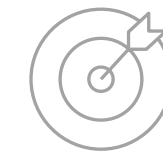

Strengthen Trust

By utilizing the comprehensive security strategies in the Azure Security Accelerator offering, iTrellis helps build customer trust and enhance your brand reputation by demonstrating a strong commitment to protecting data and privacy.

iTrellis

Azure Security Accelerator

iTrellis empowers your organization to strengthen your security posture and maintain compliance.

Implement Azure Policy and Azure Defender

Tailor and enforce Azure Policy, activate Azure Defender, and configure settings to strengthen your cloud environment against threats and ensure compliance.

Continuous Security Improvement Plan

Establish ongoing security enhancements, periodic reviews, and updates to maintain a robust and adaptable security posture in your Azure environment.

Comprehensive Documentation and Cost Analysis

Receive detailed documentation of security configurations, policies, and best practices, along with Azure cost analysis to optimize the cost-effectiveness of your security measures.

iTrellis & Microsoft Azure

Organizations have unique security and compliance needs, but development teams should concentrate on building and deploying features, not managing Azure cloud security. The Azure Security Accelerator by iTrellis efficiently configures and implements Azure Policy and Azure Defender, providing a turnkey security solution while allowing your team to focus on the product in a secure and compliant Azure environment.
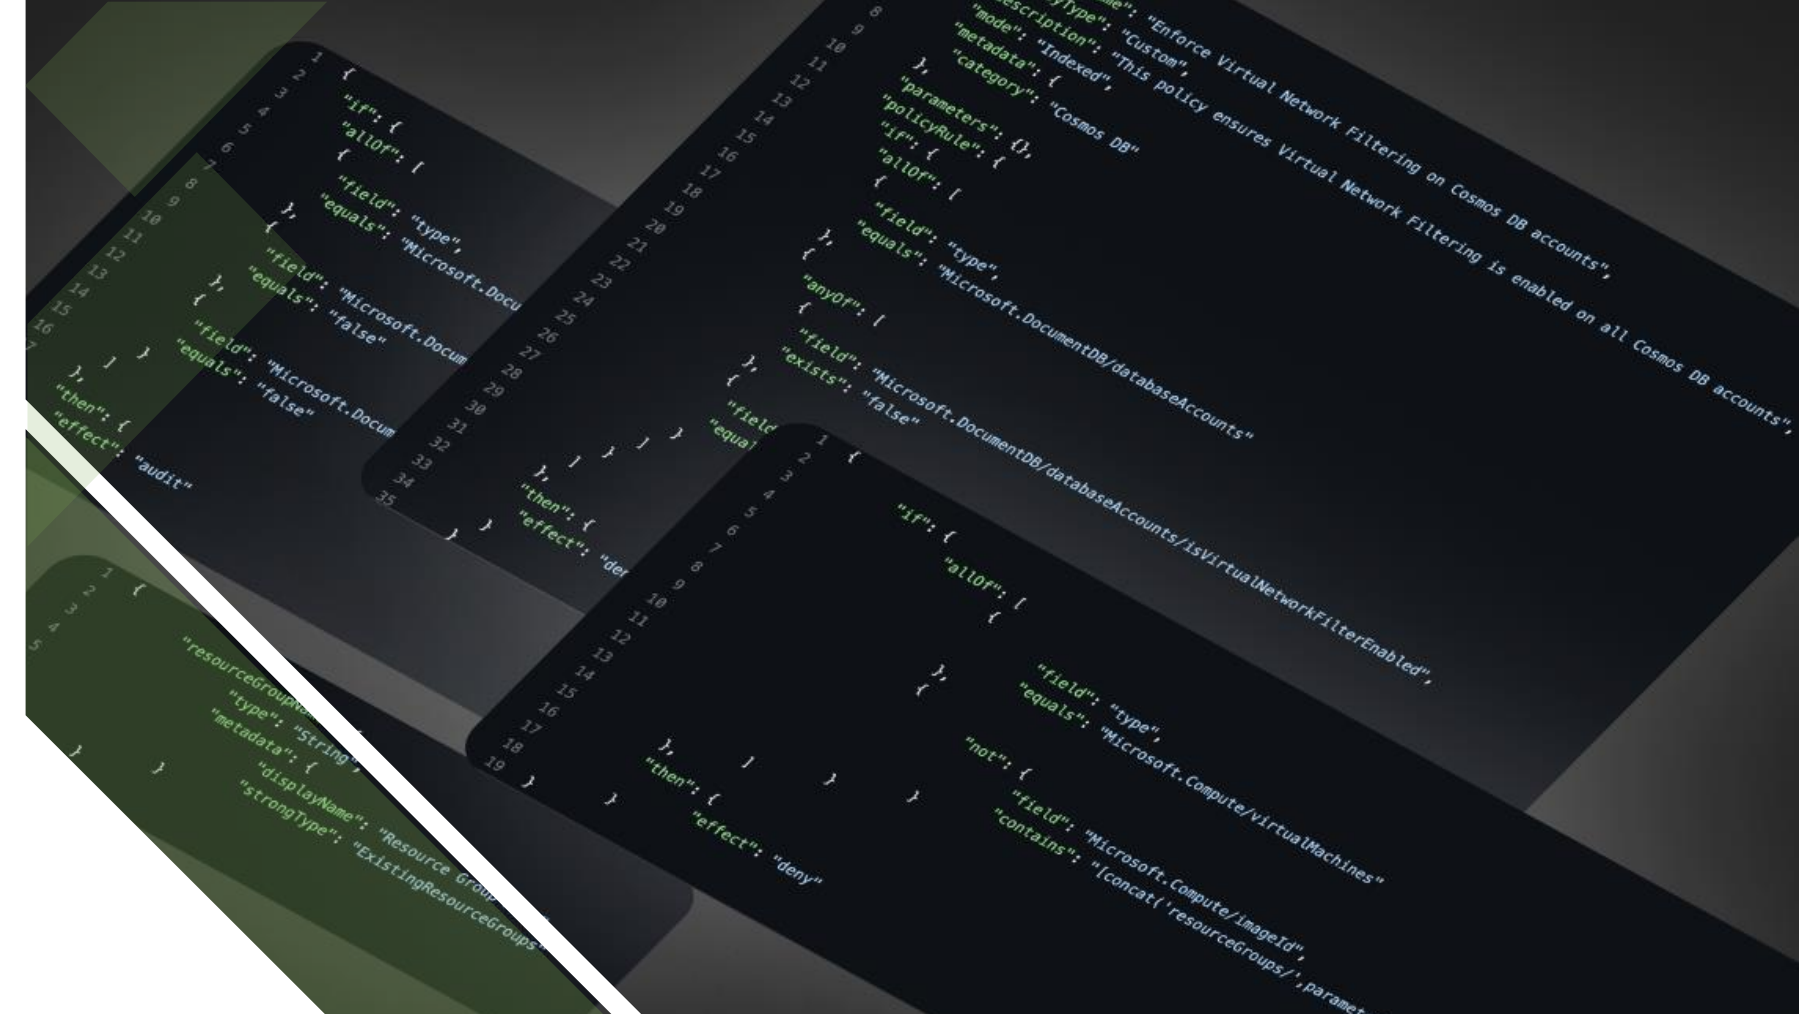

Azure DevOps

The combination of Azure DevOps (Boards) and Portfolio++ (an Azure extension for Roadmaps) will modernize your team's workflow and delivery.

Azure Policy

iTrellis implements this customizable governance tool that enforces compliance and management standards within your Azure environment.

Azure Defender

iTrellis activates this advanced threat protection service that safeguards and enhances the security posture of Azure resources.
